How to Use

HOW TO PROPERLY APPLY THE SPRAY

ON PETS

1
Shake Well
before use.

2
Test for Sensitivity
Spray a small amount on your pet's skin and wait 6-8 hours to check for any allergic reactions or sensitivities.

3
Apply Evenly
Spray lightly, making sure to cover their fur evenly, avoiding the eyes, mouth, and nose areas.

4
Massage into Fur
For best results, gently rub the spray into your pet's fur to ensure it reaches the skin where fleas and ticks reside.

5
Focus on Target Areas
Pay special attention to areas where fleas and ticks are most common, such as behind the ears, the back of the neck, and around the tail.

6
Let it Air Dry 20 min
and then thoroughly bathe or comb the pets to remove bug.

Attention For Cat and Dog 12 week and older only

Works like a miracle!! I received the parcel a week ago and tried it on first onto my cats to see if there's any good results. Alhamdulillah it's been like 4 cycles of spraying and I literally can see visible changes. The first cycle after spraying, I could notice the fleas get on top of their fur. So I comb them and spray it again. The same night I went to check again, and visible fleas on the floors. Yuck! So I spray it again and then wipe it off. Today will be the 5th cycle, I hope my babies will be fleas-free very much soon. Good services by the seller. Fast response and attentive towards the directions of use. Will be buying again soon. Thank you so muchhhhh, my furkids' thanked you too <3 ;)

Puas hati giler! Berbulan2 urus kutu.hari2, pagi petang siang malam sikat kasi buang kutu..Tak tahan tengok si comel tergaru2..

Akhirnya..sampai je spray kutu ni terus sembur banyak2..best giler tengok sekor2 kutu jatuh ke lantai..Dah puas spray kat bulu dlm 10 minit bawa kucing mandi..hehehee..harapnya takde kutu lagi..Tq seller 😊

*Yang paling best..kucing jilat bulu lepas spray boleh dan tak bawa apa2 kesan pd kucing.hehehe
